District Department of the Environment

CHAPTER 2 TECHNICAL MEMORANDUM

TO: File

THROUGH: Stephen S. Ours, P.E. *ATH for SSO*
Chief, Permitting Branch

FROM: Abraham T. Hagos *ATH*
Environmental Engineer

SUBJECT: **GOEL Services Inc**
Permit Numbers 6785 & 6785-T
Permit to Construct and Operate a Portable Concrete Crusher at 1150
Michigan Avenue, NE

DATE: September 24, 2013

BACKGROUND INFORMATION

A permit application to construct and operate a portable concrete crushing plant at 1150 Michigan Avenue, NE, Washington, DC 20011 was received by the Air Quality Division on September 17, 2013. The applicant is GOEL Services Inc.

The Air Quality Division will issue a temporary permit #6785-T to the permittee due to the time constraints related to this D.C. Public Schools demolition and re-construction project.

The permit action will be published in the DC Register on September 27, 2013. Public comments for the permit action will be solicited through October 28, 2013.

The Company has not requested that any of the materials submitted with this application be held confidential.

REGULATORY REVIEW

Chapter 2, Section 200: General Permit Requirements:

The portable concrete crushing equipment is a potential air pollution source for particulate matter and other pollutants. Thus a chapter 2 permit is required. The applicant is requesting a permit to operate the equipment for one shift a day [12 hours]. The application indicated that the crushing

would take 20 days, but the permit will be issued for a period longer than that to ensure that delays can be accommodated.

Chapter 6, Section 605: Control of Fugitive Dust

The fugitive dust control requirements of 20 DCMR 605 are applicable to this portable concrete crusher equipment. The requirements of this regulation are found in Conditions II(a) and (b) of this permit. The operational requirements are found in Conditions III(b) and (c). The facility must monitor the site for compliance per Conditions IV(b) and (c).

Chapter 6, Section 606: Visible Emissions

The visible emissions limitations of 20 DCMR 606.1 are applicable to this portable concrete crusher plant. Visible emissions shall not be emitted into the outdoor atmosphere from the operation of the portable concrete crusher plant; provided, that discharges not exceeding forty percent (40%) opacity (unaveraged) shall be permitted for two minutes in any sixty (60) minute period and for an aggregate of twelve (12) minutes in any twenty-four hour (24 hr.) period during start-up, or malfunction of equipment. This requirement is contained in Condition II(d). Monitoring for compliance is required pursuant to Condition IV(c).

Chapter 9, Section 903: Odorous or Other Nuisance Air Pollutants

"An emission into the atmosphere of odorous or other air pollutants from any source in any quantity and of any characteristic, and duration which is, or is likely to be injurious to the public health or welfare, or which interferes with the reasonable enjoyment of life or property is prohibited [20 DCMR 903.1]" is applicable to all sources. This requirement is contained in Condition II(e) of the permit.

RECOMMENDATIONS

The application to operate a portable concrete crusher and the requirements of the attached operating permit comply with all applicable federal and District air pollution control laws and regulations.

Public comments for the permit action will be solicited from September 27, 2013 through October 28, 2013. AQD will resolve any comments received before issuing the permit, and if no comments are received, I recommend that permit (#6785) be issued in accordance with 20 DCMR 200.1 and 200.2.

Due to the urgent nature of the project, for a 30-day period and until such time as permit #6785 can be issued, AQD is issuing temporary permit #6785-T.
